Re: Resolution 25-25 – Setting a Public Hearing and Taking Bids

on Broad Street Watermain Improvement Project

Date: April 21, 2025

Presented for Mayor & City Council consideration is Resolution No. 25-25 for the purpose of setting a public hearing on the proposed plans, specifications, form of contract and estimate of cost for the Broad Street Watermain Improvement Project and the takings of bids.

The public hearing will be held at the June 2nd Council meeting and the bid opening will be held on May 28th.

The 2025 Broad Street Watermain Replacement Project includes the replacement of the watermain from Elm Avenue to Pennsylvania Avenue.

We have had three recent water main breaks in the 600 block of Broad Street near Elm Avenue. Replacement of the water main was slated to be part of the reconstruction of Broad Street. This is tentatively scheduled to be done in Fiscal Year 2028-29. However, this is an old water main and it is apparent that the main will need replacing sooner, rather than later.

The total estimated cost of the project is approximately \$195,000 and will be financed from the 2021 A bond, Water Improvement Fund, and/or Tax Increment Financing.

The following resolution was offered by Councilpers	on .
who moved its adoption.	,

RESOLUTION NO. 25-25

Application for Boards and Commissions

City of Story City

504 Broad Street |515-733-2121

Date: 03/05/2025

The City of Story City Council encourages citizen participation on advisory boards and commissions. If you are interested in serving on one of the bards listed below and are willing to commit the necessary time, please complete the form below and return it to the City Clerk's Office. Please feel free to attach additional information. Your application will be kept on file for one year and will be considered when vacancies occur on the board you have designated.

Name:	John Sens		Phone: _	515-419-4783
Address:	621 Lafayette Ave, Story City, IA	50248	<u></u>	
Education:	BA in Music and BS in Environmental St	udies from University of	Nebrask	a, Lincoln.
Masters in	Music from University of Minnesota	2		
Occupation	: Team Lead - Sustainability for Chevron	Renewable Energy Grou	ıp	
Board Prefe	erence: Board of Adjustments if possible b	ut open to other opportu	nities as	well potentially.
Qualification	on for Effective Board Membership:			

I have worked professionally for 12 years in the renewable fuel industry and during that time have done a variety of consulting, auditing, and compliance work. I work with renewable energy in my current role and project management and development, so I can bring experience from my work for board decisionmaking. I frequently have to learn about a new subject and make decisions on what to do in a short amount of time, or what steps we should take before making a decision. I am passionate about the Story City community and want to make sure it continues to thrive for my family's benefit and the community at large.

Other Community Activities:

I play the trombone semi-professionally and have volunteered my performance skills with the Judge Story group and for a few other events in town. My wife is the Secretary on the Library board so our family is currently helping with that effort. I have also helped the GCC with various events in the past.

Ms. Lundy,

I am wanting to sell these cemetery plots as they were purchased by my father and grandfather, as we have no family members that will be buried in Story City because our family lives in Texas now. Since I am my parent's only child (my two sisters are buried in this cemetery), there are no other descendants to use them. Both my parents have passed away and their final wishes were to be cremated and have their ashes spread here in Texas.

Included are the signed documents you provided me.

Thank you for your kind assistance and facilitating this for me.

Regards,

James Deaton

Wastewater

Weekly & monthly sampling. (TSS, Ammonia, BOD, Tank Samples)

Monthly Maintenance: cleaning, greasing, exercising valves, replaced the effluent sample line. We are still waiting on our new permit to come but have started reporting aluminum samples.

Adam and Isaac have started clearing brush along the sewer line that runs in the woods behind lower Jacobson Park. We will be replacing some valves on the inverted syphon across the river from the WWTP and need access. We will also need to get a jet vac truck back the as one of the syphon lines is currently plugged. This will be ongoing throughout this fall because of the amount of brush that has grown in over the years. (We are still working on this project. We have cleared from the path east to the syphon but still need to clear to the west towards the bridge.) plan to finish in the spring

Applied to the reed beds 2 times.

Gridor is making good progress on the new WWTF. The base slab is done and wall forming is ongoing. We are on wall pour #11 now. The hole has been excavated for the headworks expansion.

Managed influent by-pass to the EQ while Gridor installed a gate valve on the headworks building.

Work has been ongoing on the sludge press with hopes it can be online by the end of May.

Contact is ongoing with MSA for the wastewater upgrade. (paint colors, HAVC height clearances, watermain completion etc....)

Went to the lab in Ellsworth and picked up sample bottles for our upcoming E-coli testing.

We had a construction meeting with Gridor and MSA.

UV system was put in and an E-coli sample was taken to the lab to prove start-up compliance. Installed the new anti-virus software Heather lined up for everyone.

Hach was here for our annually lab equipment calibration.

Worked with Electric pump on lift station alarms we were getting that turned out to be a problem with the auto dialer set-up. Issue is resolved.

Josh With CPM was here and pulled a mixer pump that was not functioning properly. (plugged pump)

Switched to Ag Source lab up in Ellsworth because we were having a few compliance problems with Mirobach lab in Newton.

Have been working with Woodland Farms the EDC and the DNR on a sludge storage location to use after our press is operational but before or storage building is constructed.

Working on getting things finalized with EBY and the DNR for the new wash bay at plant 2

RE: Resource Recovery System (RRS) Status Update

Dear RRS Member Agencies:

Over the past year, we have been planning for a new model of solid waste disposal, taking the place of the Resource Recovery Plant facility that has served our communities for 50 years. I would like to bring you up to date regarding our progress towards this new approach and inform you as to what the next steps will be.

After evaluating several potential sites for a new operation, the Ames City Council has identified a site within Ames that we are negotiating to purchase. This site will provide sufficient space for the waste receiving, processing, and transportation for disposal that is envisioned for a Resource Recovery and Recycling Campus. At this campus, we intend to construct facilities for commercial hauters and residents to deliver solid waste, recyclable materials, household hazardous waste, and organics including yard waste. The solid waste will be minimally processed to recover recyclable metals, and the non-recyclable solid waste will be loaded into semi-trucks for transportation to a landfill partner. Recyclable materials and green materials will be aggregated for delivery to partners who will process and responsibly dispose of these materials.

The details regarding the costs of constructing and operating this facility are being developed. Although Ames staff has prepared some preliminary cost estimates, we are in the process of seeking a consultant to validate our construction and operating cost assumptions and prepare a conceptual plan for the facility. Through this process, we will strive to keep the per capita fee at or below our existing amount of \$10.50 per person. However, we expect some cost increases will be necessary, likely to tipping fees, to make this system financially feasible. One approach we are taking to minimize cost increases is through the pursuit of grant funds—in December of 2024, we submitted an application for federal grant assistance to develop the infrastructure for this new facility.

RE: Resource Recovery System Status Update

Page 2

At the same time, we have had promising discussions with the Carroll County Solid Waste Management Commission, which is willing to entertain a partnership to landfill Story County's solid waste. We believe that Carroll County and Story County are aligned in our commitments to environmental stewardship, creative approaches to waste reduction, and partnerships to serve the best interests of both our communities. In the next few months, we hope to arrive at a long-term agreement with Carroll County that will give us certainty about where and how our solid waste will be disposed of. We plan to pursue an extension of up to two years (through June 2027) in our existing partnership with Boone County for solid waste disposal while both we and Carroll County prepare for the transition to our new partnership.

As the steps described above are taken, we are approaching a point where we will be seeking to know whether you and the other partnering agencies and communities in the Resource Recovery System are willing to enter into an extension of the 28E agreements, which are currently set to expire in 2034. Ames will need to issue debt for the new Resource Recovery and Recycling Campus operation, which is anticipated to be repaid over a period of time that extends past the expiration of the current agreements. In the next few months, we will draft and deliver for your consideration extended 28E agreements, which can be accompanied by more detailed financial information about the costs of operating the new campus.

We are excited about the prospects for the future of our partnership and the state of solid waste disposal in Story County. We look forward to providing you an update and next steps in a few weeks. If you have any questions or concerns in the meantime, please contact me at justin.clausen@cityofames.org or 515-239-5279, or Resource Recovery Plant Superintendent Mark Peebler at mark.peebler@cityofames.org or 515-239-5137.
