

BROAD STREET RECONSTRUCTION PROJECT – PHASE IV

The project includes the reconstruction of Broad Street, from Lafayette Avenue to Elm Avenue, including the intersection of Broad Street & Elm Avenue. The contractor will start on September 8th, and this will be a 45 Working Days Project.

The detour, heading west on Broad Street: Lafayette to Story, or Washington to Park. And of course, the other way if you are heading east.

In Addition, on Broad Street between Pennsylvania & Elm Avenue – single reflective posts will be placed down the middle of the street. The last three parking spaces on both sides of Broad Street at Elm Avenue will be blocked off as well. The plan is to create a, “loop around” – that is if you are heading east, you can, “loop around the end” down by GNB and head back west. This will also prevent U-turns.
